

STRONG STUFF! A STATEMENT FOR THE EAGLR FINAL FORUM 9.26.2012

THE ENTIRE KENNECOTT EAGLE PROJECT IN UPPER MICHIGAN IS FRAUDULENT, HENCE ILLEGAL.

Part 632 of Michigan Mining Law prescribes prosecution and penalties for violations.

I, Jack Parker, with 60+ years of mining engineering experience, here and abroad, do solemnly swear to tell the truth, the whole truth (limited only by time and space) and nothing but the truth. So help me God. I have studied the project, essentially full-time, 75% unpaid, for six years.

Because the application for permits to mine, submitted in February 2006, was incomplete, high-school level, incompetent, fraudulent to the point of endangering life, limb, property and environment and was neither prepared nor processed as required by Part 632 – it should have been rejected immediately. The errors, omissions and deceptions are readily apparent to persons familiar with underground mining.

It was not rejected by the regulatory MDEQ but was accepted without question, thus implicating that department in the fraud.

Part 632 prescribes prosecution and penalties for violations. Since penalties depend on number of violations or on days in violation, over 2000 of them, the penalties will be severe.

The penalties should not apply to workers and engineers on site – just doing their jobs, and doing them well, but they should be applied to the principals involved at Rio Tinto, Kennecott and MDEQ, then and now. All were apprised of the situation on several occasions, from 2006 up to the present date.

The magnitude of the crime cannot be comprehended by most people, including myself, so I bring it down to earth: The ore is worth at least 5 billion dollars, \$5,000,000,000, but what does that mean?

A dollar bill is 6" in length. 10,560 of them taped end-to-end would stretch a mile.

The diameter of Mother Earth is about 8,000 miles. The circumference at her equator is thus around 27,300 miles, equivalent to 288,288,000 dollar bills.

First prize of 5 Billion would thus wrap around the equator more than 17 times ! A staggering picture.

Their desperate greed is understandable, but not allowable.

It follows that the project must be stopped immediately. They have a problem.

This information has been presented to the courts on several occasions but, so far, they have sided with Rio Tinto, Kennecott and MDEQ even though those parties do not dispute the charges against them. Perhaps because MDEQ is the regulatory agency.

We, the people of Michigan, are being defrauded, and this is just the first such fraud – the “thin end of the wedge”. There are numerous intrusive targets along their 30 kilometer geological trend ...

DO YOU WANT JUSTICE? THEN ACT NOW!
